

## Initial Verification & Certification of Electrical Installations

This qualification prepares candidates for the initial verification and certification of electrical installation work, including three phase.

The course is aimed at practising electricians looking to enhance their knowledge of inspection and testing in line with the most up to date requirements and documentation.

**Candidates must hold the City & Guilds 2382 17th Edition Wiring Regulations qualification, or equivalent, in order to be accepted on this course.**

*'Invest in the Future with  
North West Training  
Council'*

**Duration:**  
4 days

**Course Cost per  
person:**

**£540 +vat**  
**Assessment:**

**Practical  
examination**

**Multiple-choice  
online open  
book examination**

**4 Short written  
questions**

**Certification:**

### Theory Overview

- Completing the safe isolation of electrical circuits and installations
- Initial verification of electrical installations
- Safe testing and commissioning of electrical installations
- Testing before circuits are energised
- Testing energised installations

### Practical Overview

Throughout the 4 day training period practical testing procedures will be demonstrated and delegates will have the opportunity to take part.

On successful completion of the course candidates may wish to progress on to the C&G 2391/51 Periodic Inspection & Testing of Electrical Installations.
